

Creating Health Institute

CHI is an outgrowth of *NorthCreekHerbal*, founded in 1988 by Gayle Eversole, DHom, PhD, MH, NP, ND. Gayle has been studying and using herbs and natural remedies, for health and healing, for over fifty years. She is a certified Traditional Naturopath, Master Herbalist, Aromatherapist and Homeopath. Gayle has more than thirty years experience as a nursing practitioner, nursing educator, health care administrator, and consultant. She is well-known as a popular speaker, author and consultant.

Gayle is a certified mediator and certified registered arbitrator. She completed studies in futures for business and government. Her graduate studies were in neuro-endocrine and psychiatric nursing, cross-cultural management and organizational change. Post graduate work focused on theology, ethics, and counseling.

Gayle's combined experience, knowledge base in Western medicine and natural health care, offers breadth and depth of understanding in health matters. All clinical work is based on her broad knowledge of natural approaches for health and wellness, with focused plans developed from individualized health needs and goals.
